SLH3A

Laying and removing road plates

Example of use

The applicable road plate thickness and hole dimensions shall be within the ranges of the drawing and the chart.

SUPER LOCK HOOK (Open / Close Lock Type)

Design preventing finger pinch.

Features

- During lifting, the close lock is automatically set so that the load can be lifted safely without coming off.
- When removing the hook, as a lever enables to set an open lock, removing the hook from works like a crane for instance is very easy.
- The hook mouth opens widely, making load set or remove operation very simple.

Turning the shackle and close the mouth will lock the hook automatically.

When lifting in this position, the shackle turns only to the closing direction.

State with the open lock set.

Reinforcing rod vertical lifting clamps

Clamp with fall arrest equipment

1) Take down 2) Push down the lever, turn the load the lever until the end and release the lever.

3) The open lock gets set and the shackle stays open.

4) Just by lifting it, the hook comes off automatically. (Be careful of the hook swing at the moment it comes off.)

>> For Extra Safety

SLH3AC

SUPER LOCK HOOK WITH CHAIN SLING (Open / Close Lock Type)

Features

- Chain slings can be used safely for a longer time than wire ropes.
- Including a tag showing the serial number and the rated capacity for control.
- When removing the hook, as a lever enables to set an open lock, removing the hook from works like a crane for instance is very easy.
- Size of master link
- Inner diameter: 2.76×5.51in
- Wire diameter of master link: ϕ 0.75in
